

M58 LMS Stanier NON-CORRIDOR BRAKE THIRD

D1964/1964A

Introduced 1936, last withdrawn 1967

57'

These etched sides can be built into a complete coach using products from our range as supplied in our full kits. Please refer to the panel opposite. Should you prefer they can also be used for scratchbuilding.

These coaches were used in urban areas on local and commuter trains in formations of two to six coaches, often hauled by quick accelerating tank engines. The two diagrams had differently placed roof vents but were otherwise identical.

Livery

The LMS coach body colour was maroon with black ends. Simple lining was adopted at the beginning of 1934. In 1946 the yellow was replaced with a much lighter shade referred to as 'straw'. From 1949 most were painted BR crimson.

Number and lettering styles, insignia and class designation placement did not always follow the changes of livery. For further information on a particular vehicle at a specific date please consult references and photographs.

Coaches left the works with the roof finished in a metallic aluminium paint. However, in service this quickly took on an overall muddy grey colour.

Underframes and bogies were finished in black
