

M64 LMS Stanier NON-CORRIDOR COMPOSITE

1921/1921A

Introduced 1933, last withdrawn 1966

57'

These etched sides can be built into a complete coach using products from our range as supplied in our full kits. Please refer to the panel opposite. Should you prefer they can also be used for scratchbuilding.

The suburban composite was a very useful vehicle as evidenced by the numbers built, 730 by the LMS and a further 161 by BR. Of these, 260 were to the above diagrams. These coaches were used in urban areas on local and commuter trains in formations of two to six coaches, often hauled by quick accelerating tank engines. D1921A differed in being 3" narrower than D1921.

*motor fitted ¹LMS livery, no insignia ²BR livery, ridge dome vents

Livery

The LMS coach body colour was maroon. Ends were also maroon with the detail picked out in black, but from the end of 1936 they were painted all over black. Fully panelled livery was applied to the earliest examples with lining in black and yellow. On flush sided coaches the lining was laid out as though the coach was panelled (so called 'psuedo-panelling') sometimes the verticals were at the edges of the window frames, otherwise they were on the centre of the panel between them. Simple lining was adopted at the beginning of 1934. In 1946 the yellow was replaced with a much lighter shade referred to as 'straw'. From 1949 most were painted BR crimson.

Number and lettering styles, insignia and class designation placement did not always follow the changes of livery. For further information on a particular vehicle at a specific date please consult references and photographs.

Coaches left the works with the roof finished in a metallic aluminium paint. However, in service this quickly took on an overall muddy grey colour.

Underframes and bogies were finished in black

Further information
